

98c Grant Proposal
Plan to Address Learning Loss
Light of the World Academy

Programming:

Light of the World Academy plans to use an MTSS approach to address learning loss.

After administering the NWEA Map Reading and Math Growth tests to all Kindergarten - Eighth grade students in September 2022, data drop teams will engage in data analysis to determine how students will be tiered based on academic needs.

Students identified for Tier 3 intervention will receive small group (1-3 students) targeted intervention in Reading or Math. The team will use Montessori material and philosophy to provide targeted lessons to students based on their gaps in grade level content understanding. With a teacher: student ratio of 1:3, students in this tier will receive greater individualized support.

Students identified for Tier 2 intervention will receive targeted intervention in Reading or Math during class time. The teachers will use Montessori material and philosophy to provide targeted lessons to students based on their gaps in grade level content understanding.

Tier 1 interventions will be determined for all students based on any whole group deficiencies identified through testing.

Implementation Timeline:

The implementation of these extra tiered interventions will begin in November 2022 and will end in June 2022.

Metrics Used to Evaluate the Program:

NWEA-MAP

- Kindergarten - Eighth Grade Math Growth - Administered in September, January, and May
- Kindergarten - Eighth Grade Reading Growth - Administered in September, January, and May

Estimated Costs:

Staff Stipends for data analysis and Tier II intervention - 11 staff x 1,000 = \$11,000

Extra Interventionist for Tier III Intervention - \$15,000

TOTAL \$26,000
